5/29/20

### Grand Traverse County reports four new positive COVID-19 cases, community exposure

The Grand Traverse County Health Department is reporting four new positive cases of COVID-19 today, bringing the total case count to 27. This is the largest number of positive cases in a single day in Grand Traverse County since reporting its first positive case on March 22, 2020.

None of the four cases reported recent travel, with symptoms presenting in only two of them. None of the four cases are hospitalized. Community transmission is suspected in all but one.

- Male, 20s, symptomatic, contact to known positive case
- Male, 50s, symptomatic
- Male, 20s, asymptomatic
- Male, 40s, asymptomatic

After conducting case investigations, the Grand Traverse County Health Department would like to inform the public of possible community exposure at the following sites:

- Roy's General Store, May 19, 5-7 p.m.
- Menards, May 24, 10-11 a.m.
- Blain's Farm and Fleet, May 26, 4-5 p.m.
- Red Mesa Grill, May 26, 9-10 p.m.
- Family Fare, Chums Corner, May 27, 5:30-6:30 p.m.

"We need to remain vigilant and continue to practice the pillars of prevention and mitigation that we have been talking about for months now. If you are sick, stay home. Consider your fellow residents when you are going out into the public - wear a mask, keep your distance and wash your hands often. It is more important than ever if we want to successfully reduce transmission of this virus while reengaging our economy. It's also a stark reminder that asymptomatic spreaders can be unknowingly spreading it," said Wendy Hirschenberger, Health Officer, Grand Traverse County Health Department.
