(AS OF JULY 1, 2025)

**The 2025 Minimum water billing for Peninsula Township is \$48.57 per month
and the Sewer billing is \$31.59 per benefit (a single family home is 1 benefit).**

Increases for Peninsula Township (scheduled at this time)

The charges for water are calculated by cubic feet. One cubic foot is approximately 7.48 gallons.

Included in the monthly billing is the first 600 cubic feet of water (600 x 7.48 to get 4,488 gallons).

To calculate: \$48.57 divided by 600 cubic feet = \$.08095 per cubic foot OR
\$48.57 divided by 4,488 gallons = \$.82219 per gallon (about 1 penny per gallon)

If you use more than 600 cubic feet (4,488 gallons) of water per month the cost is an additional \$4.28 for every additional 100 cubic feet (or \$4.28 for every 748 gallons).

To calculate: \$4.28 divided by 100 = \$.0428 per cubic foot OR
\$4.28 divided by 100 divided by 7.48 = \$.00572 per gallon (less than ½ a penny per gallon)

If you look at your water bill you will see the Current Reading and Previous Reading in the middle of the bill with the total consumption directly below (Units Used).

Example #1:	Current Reading	1,458
	Previous Reading-subtract from Current Reading	<u>1,000</u>
	Water use was	458 cubic feet
	(Or 458 x 7.48 = 3,426 gallons)	

Since the Water use is 458 cubic feet and this is less than 600 the bill is the minimum amount of \$46.93.

Example #2:	Current Reading	13,500
	Previous Reading-subtract from Current Reading	<u>5,500</u>
	Water use was	8,000 cubic feet
	(Or 8,000 x 7.48 = <u>59,840</u> gallons)	

Since this is over the 600 minimum, the bill would be calculated like this:

8,000	
<u>- 600</u>	\$48.57 (\$48.57 for the first 600 cu. ft.)
7,400	<u>\$316.72</u> (\$4.28 for each 100 cu.ft. over 600)
divided by 100 x \$4.14	\$365.29
