

# How to Connect Your Home to the Municipal Sewer System

## 1 Apply for Service

Submit an application to the Grand Traverse County DPW for connection to sewer. A copy can be obtained from the DPW Office. Fees vary by Township.

Contact information:  
Grand Traverse County Dept. of  
Public Works (DPW)  
2650 LaFranier Road  
Traverse City, MI 49686 Phone:  
231-995-6039

## 2 Making the Connection

In most situations, the service lead from the main to the property line is installed; if not, then this will have to be installed at Owner's expense. The Owner is also responsible for installation of the building sewer from service connection into the home.

It is strongly recommended that the Owner retain the services of a licensed underground contractor to perform this work. Contractors are required to be bonded with the DPW.

### Things to Know

You are responsible to comply with all local regulatory agencies. Check with the Building Department to see if a building permit is required. All connections require an inspection by authorized DPW personnel.

## 3 Call for Inspection

Contact the DPW to schedule an inspection and to witness the connection. A minimum of 48 hours advance notice is required for this inspection.

Other agencies may also require inspections; please contact them directly.

## 4 Payment for Service

Monthly charges vary by Township. Payment is due by the 20th day of the month or a late penalty of 10% of the bill will apply.

### Help us keep take good care of our municipal system!

As a general rule, nothing should be flushed other than toilet paper, mild detergents and wash water.

DON'T flush dangerous or damaging substances. This includes, but is not limited to pharmaceuticals, excess amounts of bath or body oils, flammable or toxic products, household cleaners (especially rug cleaners), chlorine bleach, chlorides, pool or spa products and flushable wipes. <http://www.co.grand-traverse.mi.us/DocumentCenter/Home/View/6335>

DON'T ignore leaky plumbing fixtures; repair them. A leaky toilet can waste up to 2,000 gallons per day.

DON'T dig without knowing the location of your building sewer. Call MISS-DIG before any excavation.

DO collect grease in a container and dispose with your trash.
